

Waste solutions for public services and industries

CONSULTING ENGINEERS

Seureca Consulting Engineers

We provide expert solutions for utilities, industries and service companies for efficient water, waste and energy services management.

Seureca is a member of the Veolia Group, global leader in resource management, with nearly 180,000 employees and a 160-year experience.

WASTE MANAGEMENT IS ABOUT PEOPLE

Knowledge transfer and committing employees:

Performance is achieved with knowledgeable, skilled, and committed people and an organization aligned on strategic objectives. Seureca oversees organization, develops training plans, and delivers technical training sessions on demand.

Development of social engineering:

By developing collaboration with local partners, Seureca intervenes and counsels with the informal waste sector as well as in educational campaigns throughout the community.

Municipal services

Partner for cities and populations

Industrial services

Waste audits for cost reduction and environmental standards compliance

Seureca provides its expertise in waste management to accompany industrials and the tertiary sectors in setting up a waste management system which is efficient and cost effective.

Operational Support services

Seureca supplies short - to long-term assistance to operations, providing the client with continuous engineering support for practical day to day strategy implementation. Seureca's expertise is unique, a blend of consultancy background with real operational waste service experience, backed by the skills and competencies of the Veolia Group.

This assistance can initially be occasional, but is generally over a medium to long term. This support is usually organized around one or more of the following topics:

- > Strategy and Organization
- > Assistance to operation and Maintenance
- > Deployment of Tools and Methods
- > Training and Skills Development
